HYDRASENSE™

SMART SENSING TECHNOLOGY FOR TODAY'S MODERN PUMP MANUFACTURERS

HydraSense technology offers the opportunity to add automation to a wide variety of pumps. The smart sensing technology has many benefits:

- **Automatic Operation** – Sensor allows for automatic on/off operation when water is detected.
- **Reliable** – No moving parts to break make it more reliable than a float or mechanical switch.
- **Ready to Use** – Proven design that is currently being used in already shipping products.
- **Adaptable** – The sensor can be configured to work with a variety of pump types.
